

Roma Jaiswal

Cloud Engineer | Full Stack | Multi Cloud | DevOps | AI Assisted Development

Location: Espoo, Finland | **Email:** romafin11@gmail.com | +358 451474383

LinkedIn Profile: <https://www.linkedin.com/in/romajaiswal11>

Experience Summary:

A motivated and highly skilled **Cloud Engineer, Full Stack & DevOps Professional** with **3+ years** of hands-on experience supporting **Google Cloud Platform (GCP), AWS, Azure, Linux environments, DevOps automation, cloud infrastructure, and enterprise IT operations**. Experienced in **cloud platform support, infrastructure automation, CI/CD, system administration, documentation, and process improvement**, with a strong focus on delivering secure, reliable, and scalable technology solutions.

Strong expertise in **cloud infrastructure management, deployment automation, Infrastructure as Code (IaC), Docker, Kubernetes, Terraform, GitHub Actions, monitoring, configuration management, and operational support**. Comfortable working across cloud platforms, maintaining technical documentation, standardizing operational processes, and collaborating with cross-functional teams to improve service reliability and operational efficiency.

Hands-on experience supporting **IT operations, cloud platforms, infrastructure automation, and modern engineering practices**, including **AI-assisted development**:

- AI-assisted software engineering workflows
- AI coding assistants and intelligent development practices
- AI-enabled automation and rapid prototyping
- Google Cloud Platform (GCP), AWS & Microsoft Azure
- Cloud infrastructure support and administration
- Infrastructure as Code (Terraform & AWS CloudFormation)
- CI/CD automation using GitHub Actions and Code Pipeline
- Docker, Kubernetes and containerized deployments
- Linux system administration and server management
- Monitoring, logging and operational support
- Identity & Access Management (IAM)
- Secure SDLC and DevSecOps practices
- SSL/TLS implementation and cloud security best practices
- Technical documentation, process standardization and operational improvements
- Jira, Confluence, Agile and cross-functional collaboration

Experienced in working with **Linux environments, cloud-native platforms, enterprise applications, API integrations, and scalable cloud infrastructure**, ensuring operational reliability, security, performance optimization, and continuous improvement. Comfortable collaborating with **developers, cloud engineers, platform teams, IT operations teams, project stakeholders, and business users** to support technology initiatives, streamline operational processes, and deliver high-quality solutions.

Passionate about **Google Cloud Platform (GCP), IT Operations, cloud technologies, infrastructure automation, project coordination, process improvement, DevOps culture, operational excellence, and continuous learning.**

- **3+ years of experience** as a **Cloud Engineer, DevOps Engineer, and Full Stack Developer**, specializing in **Google Cloud Platform (GCP), AWS, Azure, cloud-native application development, infrastructure automation, secure application deployment, and modern DevOps practices.**
- Hands-on experience working with **Google Cloud Platform (GCP), AWS, and Azure** across **cloud infrastructure, application deployment, DevOps automation, monitoring, system administration, and operational support** for secure, scalable, and reliable enterprise environments.
- Strong practical experience in **cloud infrastructure management, cloud operations, application deployment, infrastructure automation, monitoring, and secure cloud engineering**, supporting modern cloud-native environments and enterprise applications.
- Strong background in **CI/CD pipeline implementation, DevOps automation, and secure software delivery** using **GitHub Actions, GitLab CI/CD, Jenkins, Azure DevOps, Terraform, Docker, Kubernetes, and Infrastructure as Code (IaC).**
- Hands-on experience with **Infrastructure as Code (IaC)** using **Terraform, CloudFormation, Docker, Kubernetes, Helm, YAML, and JSON**, enabling automated, scalable, repeatable, and secure infrastructure provisioning.
- Practical knowledge of **containerization and cloud-native technologies**, supporting scalable application deployment, orchestration, operational efficiency, and reliable cloud environments.
- Applied modern **DevSecOps and cloud security best practices**, including **IAM, RBAC, SSL/TLS, secure authentication, secrets management, vulnerability management, and secure cloud engineering practices.**
- Experience with **monitoring, logging, and observability** using **CloudWatch, Grafana, Prometheus, and cloud monitoring platforms** to improve operational visibility, infrastructure reliability, troubleshooting, and performance optimization.
- Strong understanding of **Linux administration, cloud server management, backend application support, web application hosting, and enterprise cloud environments.**
- Experience creating **technical documentation, deployment documentation, operational procedures, process standardization, and continuous improvement initiatives**, collaborating with developers, cloud engineers, platform teams, operations teams, and stakeholders to deliver reliable technology solutions.
- Familiar with **Jira, Confluence, Agile, Scrum, project coordination, task tracking, cross-functional collaboration, and modern software engineering practices**, contributing to efficient project execution and operational excellence.
- A proactive and continuous learner passionate about **Google Cloud Platform (GCP), IT Operations, cloud technologies, DevOps, infrastructure automation, process improvement, cloud support, and delivering secure, scalable, and reliable technology solutions.**

Education and Key Achievement:

Bachelor's Degree, University of Calcutta, Kolkata, India.

Vocational Qualification in Information and Communications Technology (Tieto- ja viestintätekniikan perustutkinto), Stadin AO / Stadin ammattiopisto, Helsinki, Finland (Aug 2024 – June 2026). Successfully completed **195 competence points (out of 195)** in **ICT studies** conducted in **Finnish language** with strong specialisation in **software development, coding, cloud technologies, web application development, and modern IT engineering solutions**. Achieved **Grade: 4.8/5**.

Degree Programme in Information and Communication Technology (ICT), Metropolia University of Applied Sciences, Helsinki, Finland (Jan 2026 – Jul 2027, Ongoing) with focus on **programming, software development, cloud technologies, problem-solving, and modern IT engineering**.

Finnish Language & Integration Training, Axxell, Espoo Finland (Nov 2023 – May 2024) with focus on **Finnish communication, workplace language skills, teamwork, integration studies, grammar, writing, and speaking**. Achieved **Grade: A2.2** during the training program and currently progressing at approximately **B1 level proficiency** in Finnish communication.

- ✓ Claude **101 Certificate of Completion (Anthropic Academy, July 2026)**
- ✓ Awarded **Best English Communication Excellence – Kaaira Techsoft (2021), India**
- ✓ Certified in **Customer Service Excellence – Dale Carnegie Training, New York, USA**

Languages:

- ✓ **English – Fluent | Professional Working Proficiency**
- ✓ **Finnish – Intermediate Working Proficiency (*approximately B1 level*)**
- ✓ **Bengali – Native / Fluent**
- ✓ **Hindi – Native / Fluent**

Professional Experience Summary:

ALGOAI Oy, Espoo, Finland – Cloud Engineer | DevOps & Full Stack Developer: April 2023 – Present | Supported **Google Cloud Platform (GCP), AWS, and Azure** environments, cloud infrastructure, DevOps automation, CI/CD pipelines, Linux administration, infrastructure automation, technical documentation, and secure cloud-native application deployment.

Medigoo Oy, Espoo, Finland – Full Stack & AI Integration Intern: January 2026 – April 2026 | Contributed to AI integration, cloud application development, automation workflows, Linux-based development, API integration, and collaborative software delivery.

Medigoo Oy, Espoo, Finland – Full Stack Developer Intern: August 2025 – November 2025 | Worked on cloud-based application development, API integration, Linux environments, technical documentation, software engineering practices, and cross-functional collaboration.

Hoiwa Oy, Espoo, Finland – UI/UX Intern: March 2024 – April 2024 | Designed user interfaces, created prototypes, collaborated with development teams, prepared design documentation, and improved user experience for modern web applications.

Koshi Ventures Private Limited (ALGOAI India), India – Founder | Full Stack Software Engineer:

November 2021 – Oct 2022 | Led full-stack software engineering, cloud platform development, backend application development, DevOps automation, CI/CD implementation, RESTful API development, Docker, Kubernetes, Infrastructure as Code (IaC), AI-enabled software solutions, software architecture, technical documentation, and digital product development.

Kaaira Techsoft, Kolkata, India – HR Specialist: 6+ Years | Managed stakeholder communication,

coordination, documentation, reporting, operational activities, and cross-functional collaboration while supporting recruitment and organizational processes.

- **Cloud Platform & IT Operations:**

Hands-on experience working with **Google Cloud Platform (GCP), AWS, and Azure** to deploy, manage, monitor, and support cloud infrastructure, ensuring reliable, secure, and scalable enterprise environments. Experienced in cloud operations, infrastructure support, system administration, and cloud-native technologies.

- **Cloud Infrastructure Automation & DevOps:**

Designed, implemented, and maintained **CI/CD pipelines** using **GitHub Actions, GitLab CI/CD, Jenkins, Azure DevOps, and AWS CodePipeline**, automating build, testing, deployment, and release processes while improving operational efficiency and software quality.

- **Infrastructure as Code (IaC):**

Provisioned and managed cloud infrastructure using **Terraform, CloudFormation, Docker, Kubernetes, Helm, YAML, and JSON**, enabling automated, repeatable, scalable, and secure infrastructure deployments across multi-cloud environments.

- **Cloud Monitoring & Operational Support:**

Supported cloud infrastructure using monitoring and observability tools including **CloudWatch, Grafana, Prometheus, Azure Monitor, and GCP monitoring services**, performing infrastructure monitoring, troubleshooting, operational support, and performance optimization.

- **Linux & Cloud Administration:**

Strong practical experience in **Linux system administration, cloud server management, application deployment, backend support, web server configuration, and maintaining reliable cloud environments**.

- **Cloud Security & DevSecOps:**

Applied modern security best practices including **IAM, RBAC, SSL/TLS, secure authentication, secrets management, vulnerability assessment, secure CI/CD pipelines, and cloud security governance** to protect enterprise applications and cloud infrastructure.

- **Application Development & API Integration:**

Developed and supported **cloud-native applications, REST APIs, backend services, and enterprise web applications** using **Java, Spring Boot, PHP (Laravel), Python, MySQL, and PostgreSQL**, ensuring scalable, secure, and maintainable solutions.

- **Documentation & Process Improvement:**

Prepared **technical documentation, deployment documentation, operational procedures, configuration documentation, and implementation guides**, contributing to process standardization, operational excellence, and continuous improvement.

- **Collaboration & Project Delivery:**
Worked closely with **developers, QA engineers, cloud engineers, DevOps teams, and stakeholders** in Agile environments. Familiar with **Jira, Confluence, Scrum, project coordination, task tracking, and cross-functional collaboration**, supporting efficient project execution and technology initiatives.

Technical Key Skills:

Cloud Platforms & IT Operations

Google Cloud Platform (GCP), AWS, Microsoft Azure, Cloud Infrastructure, IT Operations, Cloud Administration, Infrastructure Support, Cloud Monitoring, Cloud Security, Multi-Cloud Environments

AI-Assisted Engineering & Intelligent Platforms: Machine Learning Fundamentals, LLM Integration, Agentic AI Systems, LLM Agents, AI Workflow Orchestration, ChatGPT Integration, Chatbot Development, Prompt Engineering, AI-Assisted Development (Cursor, Replit, Lovable), AI-Driven Code Generation, Intelligent Automation, Secure AI Development Practices, Claude (Desktop, Code, Co-worker, CLI)

IT Operations & Project Collaboration

Jira, Confluence, Technical Documentation, Process Documentation, Process Standardization, Project Coordination, Task Tracking, Agile, Scrum, Cross-Functional Collaboration

DevOps & Infrastructure Automation

GitHub Actions, GitLab CI/CD, Jenkins, Azure DevOps, AWS CodePipeline, Terraform, CloudFormation, Docker, Kubernetes, Helm, Infrastructure as Code (IaC), CI/CD Automation

Linux & System Administration

Linux, SSH, System Administration, Cloud Server Management, Application Deployment, Web Server Management

Monitoring & Operational Support

CloudWatch, Grafana, Prometheus, Azure Monitor, GCP Monitoring, Logging, Infrastructure Monitoring, Troubleshooting, Performance Optimization

Programming & Backend Development

Java, Spring Boot, PHP (Laravel), Python, JavaScript, REST APIs, HTML5, CSS3, Backend Development

Security & Identity Management

IAM, RBAC, Secure SDLC, SSL/TLS, HTTPS, Secure Authentication, Secrets Management, API Security

Database Technologies

PostgreSQL, MySQL, MariaDB, Database Management

Web Technologies

WordPress, CMS Management, Website Deployment

AI-Assisted Development

ChatGPT, LLM Integration, Prompt Engineering, Cursor, Claude, Replit, Lovable

Technical Projects:

ALGOAI Oy, Espoo, Finland: April 2023 to Till Now

Project Name	Healthcare AI-Enabled Cloud Platform Service
Project Role	Cloud Engineer DevOps Engineer Full Stack
Key Skills	Google Cloud Platform (GCP), AWS, Azure, PHP (Laravel), Python, JavaScript, REST APIs, Docker, Kubernetes, Terraform, CloudFormation, GitHub Actions, CI/CD, Linux, PostgreSQL, MySQL, MariaDB, Cloud Infrastructure, Infrastructure as Code (IaC), Monitoring, CloudWatch, Grafana, Prometheus, Jira, Confluence, Technical Documentation, SSL/TLS, IAM, DevOps, AI Integration
Project Contribution	• Developed and supported cloud-native healthcare applications using PHP (Laravel), Python, and REST APIs, delivering secure and scalable backend solutions. • Supported cloud infrastructure, application deployment, monitoring, and operational activities across AWS, with exposure to Google Cloud Platform (GCP) and Azure environments. • Contributed to the implementation and maintenance of CI/CD pipelines using GitHub Actions and AWS CodePipeline, improving deployment automation and release efficiency. • Assisted in provisioning and maintaining cloud infrastructure using Terraform and CloudFormation, following Infrastructure as Code (IaC) best practices. • Deployed and supported containerized applications using Docker and Kubernetes, improving deployment consistency and application reliability. • Performed Linux server administration, application deployment, troubleshooting, and operational support. • Supported cloud monitoring and observability using CloudWatch, Grafana, and Prometheus to improve system reliability and performance. • Applied cloud security best practices including IAM, SSL/TLS, secure authentication, HTTPS configuration, and secrets management. • Contributed to technical documentation, deployment guides, operational procedures, and collaborated with developers and stakeholders to support project delivery and continuous improvement.

	Assisted in integrating AI-powered capabilities using LLM technologies and intelligent automation within healthcare workflows.
Project Duration	Jan 2025 To till Now

Project Name	Enterprise Data Customer Platform Service
Project Role	Cloud & DevOps Engineer Full Stack
Key Skill	Google Cloud Platform (GCP), AWS, Azure, Java, Spring Boot, Python, REST APIs, GraphQL, Docker, Kubernetes, Terraform, GitLab CI/CD, GitHub, Linux, PostgreSQL, Kafka, Helm, CI/CD, Infrastructure Automation, Monitoring, Grafana, Prometheus, Jira, Confluence, Agile, Cloud Infrastructure, DevOps
Project Contribution	- Developed and supported enterprise backend services using Java, Spring Boot, REST APIs, GraphQL, and PostgreSQL. - Contributed to cloud migration, application deployment, and infrastructure support across AWS, Azure, and cloud-native environments. - Designed and maintained CI/CD pipelines using GitLab CI/CD, automating build, testing, and deployment processes. - Supported Infrastructure as Code (IaC) implementation using Terraform, enabling automated and repeatable cloud infrastructure provisioning. - Assisted in deploying and managing containerized applications using Docker, Kubernetes, and Helm. - Implemented event-driven integration using Kafka, improving enterprise system connectivity and data synchronization. - Performed Linux administration, application deployment, infrastructure maintenance, and troubleshooting. - Applied security best practices including IAM, RBAC, secure authentication, and cloud security controls. - Supported infrastructure monitoring using Grafana and Prometheus, contributing to operational reliability and performance optimization. - Collaborated with developers, QA engineers, cloud engineers, and stakeholders using Jira, Agile, and Scrum methodologies. - Contributed to technical documentation, deployment documentation, implementation guides, and continuous process improvements.
Project Duration	April 2023 To Dec 2024

Medigoo Oy, Espoo Finland: Jan 2026 to April 2026

Project Name	AI-Driven Medical Data Processing & LLM Integration Platform
Project Role	Full Stack & AI Integration Intern
Key Skill	Python, Machine Learning Fundamentals, LLM Integration, Agentic AI Systems, LLM Agents, AI Workflow Orchestration, ChatGPT Integration, Chatbot Development, Prompt Engineering, AI-Assisted Development (Cursor, Replit, Lovable), AI-Driven Code Generation, Linux, SSH, PuTTY, MariaDB, MySQL, GitHub, Docker, Kubernetes
Project Contribution	• Python-Based AI Development: Developed backend logic and AI integration workflows using Python for processing and structuring medical data. • LLM Integration & Agentic AI: Integrated ChatGPT-based LLM systems into healthcare workflows and assisted in implementing agentic AI pipelines for intelligent task automation. • Prompt Engineering & Optimization: Designed and refined prompts to improve contextual accuracy and reliability of AI-generated outputs. • Database Management: Managed and optimized structured data storage using MariaDB and MySQL to support AI-driven processing tasks. • Linux Server & Deployment: Worked in Linux environments using SSH and PuTTY for deployment, debugging, and configuration of AI services. • Containerization & Orchestration: Containerized Python-based AI services using Docker and supported Kubernetes deployments for scalability and reliability. • Version Control & Collaboration: Used GitHub for source control, collaboration, and version management across development environments. • AI-Assisted Development: Leveraged tools such as Cursor, Replit, and Lovable to accelerate Python development and AI-driven code generation workflows.
Project Duration	Jan 2026 To April 2026

Medigoo Oy, Espoo Finland: Aug 2025 to Nov 2025

Project Name	Healthcare Web Application Deployment & Secure Configuration
Project Role	Full Stack Developer Intern
Key Skill	PHP, JavaScript, HTML5, CSS3, Linux, SSH, PuTTY, HTTP, HTTPS, SSL/TLS, SMTP Configuration, Firewall Configuration, API Token Authentication, Cloudflare, Let's Encrypt, MariaDB, MySQL, WordPress

Project Contribution	• PHP-Based Application Support: Assisted in deployment and configuration of a PHP-based healthcare web application, ensuring proper backend connectivity and performance. • SMTP Configuration: Configured and tested SMTP services for email notifications and system alerts within the application and WordPress environment. • HTTP/HTTPS Enablement: Implemented and configured HTTP and HTTPS protocols, ensuring secure communication using SSL/TLS certificates. • SSL Certificate Management: Installed and managed SSL certificates using Let's Encrypt to enable secure HTTPS access. • CDN & Security Optimization: Integrated Cloudflare to enhance security, DNS management, and performance optimization. • Linux Server Management: Performed server configuration and troubleshooting using Linux, SSH, and PuTTY. • Database Management: Worked with MariaDB and MySQL to support application data operations. • WordPress Configuration: Managed WordPress deployment, configuration, and security hardening in a production environment.
Project Duration	Aug 2026 To Nov 2025

HOIWA Oy, Espoo Finland: March 2024 to April 2024

Project Name	AI-Powered Healthcare UI Design System
Project Role	UI/UX Designer & Visual Experience Intern
Key Skill	Canva, Wireframing, Basic Prototyping, Layout Design, Visual Content Creation, User-Centered Design (UCD), Design Thinking, Responsive Layout Planning, JavaScript, HTML5, CSS3
Project Contribution	• Wireframing & Layout Design: Designed structured wireframes for healthcare dashboard interfaces, focusing on usability, accessibility, and clean navigation flow. • UI Mockups in Canva: Created high-fidelity UI mockups using Canva, including login screens, patient dashboards, appointment booking modules, and analytics views. • Basic Prototyping: Developed interactive prototype flows demonstrating user journeys such as patient registration, appointment scheduling, and health record access. • User-Centered Design: Applied UX principles to improve user experience by simplifying navigation, reducing cognitive load, and ensuring intuitive interface design. • Visual Content Creation: Designed banners, healthcare infographics, and visual assets for platform presentation and marketing materials.

	• Design Consistency: Established color palettes, typography standards, and layout consistency to maintain a professional healthcare branding identity. • Responsive Layout Planning: Designed layouts adaptable for desktop and tablet views, ensuring cross-device usability.
Project Duration	March 2024 To April 2024

-----Thank You: The End-----
